ORCID ID: 0000-0002-2350-1559

EDUCATION

Brandeis University
PhD *in Neuroscience (Defense date 30th August 2012, degree awarded February 2013)*
Advisor: Eve Marder; Thesis: Dynamics of multi-functional, pattern-generating, neuronal networks

Barnard College, Columbia University
BA*, Physics major, Applied Mathematics minor, 2006*

GRANTS, HONORS, AND AWARDS

Co-PI on WRF Innovation Post-Baccalaureate Fellowship in Neuroengineering for Adree Songco-Aguas, 2019
Research Exchange fellow, California alliance, 2019
BRAINS fellow, 2019
NIH NINDS Career Transition K Award, 2018
Semi-finalist, Burroughs-Wellcome Fund, Career Award at Scientific Interface, 2017
Perfect Pitch Competition for explaining my research, 1st place UWIN division, 2016
CMU Modeling Neural Activity conference, travel award, 2016
WRF Innovation Postdoctoral Fellowship in Neuroengineering, UWIN, 2016
Allison Doupe Fellowship to attend McKnight Endowment Fund Conference, 2016
Barnard Alumnae Association Fellowship for Graduate Studies, 2010
Bernstein Conference on Computational Neuroscience Travel Fellowship, 2009 and 2011
BOLLI Teaching Fellowship, Brandeis University, 2008
IGERT Training Fellowship, 2006
SURP Research Experience for Undergraduates, 2005
Barnard College Leadership Award, 2005
GE Fellowship for minority students in science, 2005
Irene Diamond Scholarship, 2004
Charles Dana Undergraduate Scholarship, 2004
Dulcida Romero Chicón Scholarship, 2003

CONFERENCE ABSTRACTS

Gutierrez GJ, Rieke FM, Shea-Brown ET. Info in a bottleneck: The compression of information in neural circuits. San Diego, CA: Society for Neuroscience 2018.

Gutierrez GJ, Shea-Brown E, Rieke F. Info in a bottleneck: exploring the compression of visual information in the retina. Seattle, WA: Organization for Computational Neuroscience 2018. **talk*

Gutierrez GJ and Deneve S. Spike-frequency adaptation optimizes the tradeoff between efficiency and accuracy in a predictive coding model. Waikoloa, HI: Modeling of Neural Activity conference hosted by Carnegie Mellon 2016.

Gutierrez GJ and Deneve S. Spike-frequency adaptation optimizes the tradeoff between efficiency and accuracy in a predictive coding model. Chicago, IL: Society for Neuroscience 2015. **talk*

Gutierrez GJ and Deneve S. Spike-frequency adaptation optimizes the tradeoff between efficiency and accuracy in a predictive coding model. Bilbao, Spain: Neural coding, computation, and dynamics conference 2015.

Gutierrez GJ and Deneve S. Adaptation and homeostasis in a spiking predictive coding network. Salt Lake City, UT: Cosyne 2015.

Gutierrez G and Marder E. The rectification of an electrical synapse can change the functional output of a pattern-generating circuit. Paris, France: Organization for Computational Neuroscience 2013.

Gutierrez G and Marder E. An electrically coupled and synaptically inhibited neuron switches between competing oscillator sub-networks via multiple mechanisms. New Orleans, LA: Society for Neuroscience 2012.

Gutierrez G, Goeritz M, Marder E. Signal propagation in a small neural network: the contribution of inhibitory synapses and electrical gap junctions to signal propagation properties of a central pattern generator. San Diego, CA: Society for Neuroscience 2011.

Gutierrez G and Marder E. Signal propagation in a small neural network. Freiburg, Germany: Bernstein Conference for Computational Neuroscience 2011.

Gutierrez G, Abbott LF, Marder E. Are biological neural networks capable of acting as computing reservoirs? Frankfurt, Germany: Bernstein Conference for Computational Neuroscience 2009.

Gutierrez GJ, Abbott LF, Marder E. Can a biological neural network act as a dynamic reservoir? Chicago, IL: Society for Neuroscience 2009.

INVITED TALKS

Northwestern University, Neurobiology Department seminar, January 19th, 2020.
Harris-Stowe State University, Department of Life Sciences seminar, November 30th, 2020.
Yale University, Emonet group seminar, November 23rd 2020.
Oberlin College, Neuroscience Department Seminar, November 20th, 2020.
Stanford University, Computational Neuroscience Journal Club, October 28th, 2020.
Columbia University, Psychology Department Seminar, October 19th, 2020.
Johns Hopkins University, Neuroscience Department Seminar, October 8th, 2020.
UW Applied Math 50th Conference 2019, Seattle, WA. Neural and Neuronal Networks mini-symposium.
Neural Computation and Engineering Connection 2018, Seattle, WA.
Cosyne 2015, Salt Lake City, UT. “Cortical Circuits in Action” Workshop.

RESEARCH & TEACHING EXPERIENCE

University of Washington, Seattle, WA **April 2016 – present**
Postdoctoral researcher and UWIN fellow in the Applied Mathematics dept. Advisors: Eric Shea-Brown and Fred Rieke. Topic: Contribution of local neuron properties to global network computation.

Janelia Research Campus, Ashburn, VA **October 2015 – March 2016**
Visiting postdoctoral researcher. Advisor: Shaul Druckmann. Topic: Interplay between recurrent connectivity and intrinsic neuron properties in a predictive coding model.

École Normale Supérieure, Paris, France **April 2013 – September 2015**
Postdoctoral researcher in the Group for Neural Theory, Cognitive Studies dept. Advisor: Sophie Denève. Topic: Adaptation and population coding in a predictive coding model.

Brandeis University, Waltham, MA **September 2012 – March 2013**
Postdoctoral researcher in Eve Marder's lab. Continued work on computational modeling of neural circuits and neuromodulation.

Brandeis University, Waltham, MA **September 2006 – August 2012**
Research trainee and IGERT fellow, Advisor: Eve Marder. Electrophysiology and computational modeling of crustacean stomatogastric nervous system. Studies focused on neuromodulation of neural circuits.

Brandeis University, Waltham, MA **Fall 2007 & Spring 2008**
Teaching Assistant for BioLab and Neuropharmacology courses: Graded homework and exams and held regular study sessions and office hours.

Barnard College, New York, NY **Spring 2006**
Teaching Assistant for Physics Department: Taught Electricity and Magnetism Laboratory section for Dr. Janna Levin's course. Responsibilities included lab set-up, lecturing, and grading.

New York University, New York, NY **Summer 2005**
SURP Research Experience for Undergraduates, IGERT research fellow: Studied visual preference in Nava Rubin's psychophysics lab.

City College of New York, New York, NY **Summer 2004**
Summer Research with Professor Jay Edelman: Studied vision in human subjects. Designed and coded programs using MATLAB and EYEtracker. Analyzed data and presented findings to fellow student researchers and professors.

ADDITIONAL TRAINING and STUDY

Methods in Computational Neuroscience, Woods Hole, MA July 30, 2014 – August 27, 2014
Computational and Cognitive Neuroscience course, Shanghai, China July 5, 2014 – July 23, 2014

WORK EXPERIENCE

American Museum of Natural History, New York, NY **November 2003 – August 2006**
Astrophysics Education Coordinator (part-time): Developed and taught astrophysics programs aimed at children and teachers. Managed the Saltz High School Internship Program, including training, supervision, and design of activities. Oversaw the maintenance of the Saltz Carts: moveable exhibitions with interactive, educational activities.

American Museum of Natural History, New York, NY **November 2002 – November 2003**
Space Show Presenter and Educator (part-time): Operated the space show in the Hayden Planetarium. Programmed space shows and performed live sky presentations using the Zeiss star projector. Presented and performed in the "Kid's show": an interactive, live, educational show in the Hayden Planetarium. Assisted in teaching and developing astronomy programs for children.

SERVICE and PUBLIC OUTREACH

Diversity and Inclusion committee, Cosyne conference, 2020.
Computational neuroscience journal club leader, University of Washington. Academic year 2018-2019.
Reviewer of abstract submissions for Cosyne conference, 2018, 2019, 2020.
Chair, Computational Neuroscience Social, Society for Neuroscience conference, 2017.
Co-chair, Computational Neuroscience Social, Society for Neuroscience conference, 2016.
Peer review of manuscripts for PLoS Computational Biology, Frontiers in Computational Neuroscience, and Journal of Visualized Experiments.

Guest speaker for YSP-REACH program, University of Washington. Summer 2019.
Guest speaker at Girls Who Code, Seattle, WA. Multiple sessions every summer since 2016.
Panelist at Emerald City Comic Con's "Science doesn't work that way, goodnight!" event. March 2019.
Skype a Scientist participant. Summer 2018.
Guest speaker, Darwin Day at the Burke Museum, Seattle, WA. 18 February 2018.
Volunteer, UW Bioscience experience program for underrepresented minority students. 21 July, 2016.
Guest science speaker at Heritage High School, Leesburg, VA. 11 February, 2016.
Women in Science club co-organizer at Brandeis University, 2012.
Barnard Alumnae Admissions Representative (BAAR) 2010 to present.

EXTRACURRICULAR

Member of the board of directors of the Young Patrons Circle of Pacific Northwest Ballet, 2017-2019; Data Analytics committee and Executive committee (Secretary).

"Grow with Google" Udacity scholarship, Android Basics Nanodegree program, 2018.

Art Neureau contributor, 2018.
